Neue. 1617.

## A Prognostication

seruing for the yeare of

our Lord God and Saul.

our Iesus Christ.

1617.

**W**herin you may behold and  
obserue the grounds of the alterati-  
on and conditiō of the foure quar-  
ters of this yeare, and also the estate  
and disposition of the ayre, for each  
seuerall moneth, according to the in-  
clination of the Celestiall bodies,  
with the change of the Moone, and  
the time of the Eclipses, and other  
necessary obseruations, conuenient  
in such a worke to be  
noted.

Calculated, and especially referred,  
to the longitude and Elevation of  
the Pole Arctike, of the famous  
towne of great Yarmouth, in Nor-  
folke, and may serue indifferent-  
ly for all England.

Collected and published by  
Iosseyr Neue.

The beginning and ending of the termes  
with their Returnes this present yeare 1617.

¶ Hillarie Terme beginneth the 23. date of January  
and endeth the 12. of February, & hath foure returnes  
Ostabis Hillarij. } } Crastino Purifica.  
Quind. Hillarij. } } Octabis Purifica.

¶ Easter Terme beginneth the 6. of May, and endeth  
the 2 of June and hath 5 returnes,  
Quind. paschæ. } Mense paschæ. } Quinque paschæ.  
Tres paschæ. } } Crasti Ascension.

¶ Trinitie Term beginneth the 20 of June, and en-  
deth on the 9. of July, and hath foure Returnes, that  
is to say.  
Crasti Trinitatis. } } Quind. trinitatis.

¶ Note also that the Exchequer openeth eight daies  
before any Terme beginne, except Trinity Terme,  
in which it openeth foure daies before.

¶ On these dayes following, the Judges sit  
not at Westminster.

In } Hillary }  
} Easter }  
} Trinity } Terme, on }  
} Michaelmas. } } Ascension } day  
} } Midsummer. }  
} } Sholland }

## Of the Eclipses which shall hap- pen this present yeare of our Lord God, 1617.

**T**here shall appeare and bee scene. this yeare of our  
Lord God, 1617. five Eclipses of the two great  
Lights of Heaven, three of the Sunne, and two of the  
Moone: the Eclipses of the Sunne, & one of the Moone,  
shall not be apparant in our Horizon, but to them that  
dwell opposite to vs, whose night is our day, by the  
contrary period of the Sunne. As concerning the e-  
vents of their severall accidents, (or observations) I  
leave to speake of, as improper to our Climate.

### Of the Eclipse of the Moone.

**T**he last of the Eclipses, being of the Moone, will bee  
objected to our sight, on the 6. day of August, being  
Wednesday, 50. minutes after season of the clocke at  
night, she being at that instant in the third face of Aqua-  
ry, and diametrically opposite unto the Sunne, (neare  
Caput Draconis) in a signe of the Tery triplicity, natu-  
rally hot and moist, of complexion, sanguine masculine,  
diurnall, fixed, occidentall; the house of Saturne, govern-  
tor; and ruler of the legges. This lunary obscuration,  
from the beginning to the end, will be three houres,  
and 45. minutes. The points of degrees eclipsed, are 16.  
and 45. minutes, &c.

# Briefe Rules and necessary Observations, concerning Blee- ding, Bathing, Purging, and Swea- ting, according to the motions of the Moone.

**W**hen the weather is either extremely hot or cold, it is not then convenient, eyther to let blood, or to purge, vntil some great necessity do require it: yet notwithstanding w<sup>th</sup> this blood-letting be for the Phlegme, the Apoplexie, for a continuall hea-ach, proceeding of Cholick, or blood, or for any hot burning fever, or other extreme paine, a man in such a case may not chuse a chosen time, because the patient might in season in the meane season. But in this fore-said case of extreme blood, it is not to be let in such quantity as otherwise it would, if a chosen time might conveniently be expected.

The best time to let the Phlegmaticke blood, is when the Moone is in Aries, or Sagittarius, the head and chighs.

For the Melancholly, the Moone being in Libra, or Aquarius, the buttocks and legs excepted.

For the Cholericke, the Moone being in Cancer, Scorpio, or Bittes, the breast and feet excepted.

For the Sanguine, as be good which before is named.

In the Spring time let blood at the right Arm. In harvest time let blood at the left Arm.

## For Bathing.

**B**athings are commonly used, rather for pleasure then for profit, especially where hot houses are ouer-much haunted: but I minde not to speake of them in this place, otherwise then to aduertise those that tender their owne health, to be wary and circumspect in resorting vn-

to them without iust cause, & immediately after, or with  
such persons as be vncleane. Know that it is not good  
to bathe when the Moone is in earthly signes, as in  
Taurus, Virgo, or Capricornus: the reason is because  
they are of a colde and dry nature, and the nature of cold  
is to reſtraine and binde: and ſo the moone being in theſe  
ſignes, the pores of the body are cloſed and ſhut, ſo that  
there can be no reſolution of humors and ſuperfluities,  
which by bathing, ought to be auoided.

But in fiery ſignes, as when the moone is in Aries,  
Leo, or Sagittarius, then it is a good time for Bathing,  
for then the body is apt to reſolution; for it is the nature  
of heate to open and reſolve.

It is beſt bathing, two or three dayes after the change,  
and at the full of the moone for then the ſuperfluities are  
ripe, and ready to auoid, and diſpoſed to flowe and iſſue  
out, which indeed is the very end and uſe of bathing. If  
any will enter into the Bath, onely for cleannesse ſake,  
let the moone be in Libra or Piſces.

Further, if bathing be vſed for health, let the party  
grieved, learne of the wiſe Phyſician, whether his ſick-  
neſſe hath need of moſtning, or drying: for if it both  
require moſtning, as in Pthiſis, and ſuch like, then  
let him bathe in watery ſignes, hauing good aſpects of  
Iupiter and Venus. But if the ſickneſſe require drying,  
as in paraliſis, and the like, then let him bathe, the moone  
being in fiery ſignes, hauing good aſpects of Mars and  
the Sunne.

Also, before you enter into any Bath, your body  
muſt be purged: for if you go in vnprepared and vnpre-  
pared peraduenture you may be worſe after, then before.

The beſt time of the yeare to bathe in, is the Spring  
and Harueſt, and in them the months of May and Sep-  
tember. The beſt time of the day to go into the Bath, is  
an houre after the Sun riſing at the leaſt, alwayes pro-  
vided, that you muſt walke eſther an houre, or halfe an  
houre before, & haue a ſtole either by nature or by art. Ye  
muſt couer your heads well, ſo long as ye be in the bath,  
and beware you drinke no cold drinke, although you be  
very thirſty: but forbear all things that bee colde,

## A Prognostication

least when ye are hot within, the cold strike suddenly into some principall member, and so hurt you.

The time of tarrying in the bath, is commonly one houre, but it may be more or lesse, according to the nature of the bath, or sicknesse of the party, at the discretion of the wise Physitian.

## For Purging.

In purg- ing these 5. things ought to be knowne	}	<ol style="list-style-type: none"> <li>1. The humors which aboundeth.</li> <li>2. The best way to avoid it.</li> <li>3. The strength of the person.</li> <li>4. The manner of the sicknesse.</li> <li>5. The force and nature of the medicine.</li> </ol>
---	---	---

For when these things are not considered and observed, many perilous accidents may follow, and greatly grieve and hurt the body.

Good signes for purging generally, are cancer, scorpio, and pisces.

Particularly, as with potions or drinks, in scorpio. Purge with electuaries, the Moone being in Cancer. Purge with pills, the Moone being in Pisces.

Take preparatiues, the moone in Gemini, Libra, or Aquarius.

Take vomits, the moone in Aries, Taurus, or Capricorne.

Take gargarises, the moone in Aries, Cancer, or Capricorne.

Take glisters, the moone in Libra, or Scorpio.

To prouoke needings, the moone in Cancer, Leo, or Aitza.

To stoppe fluxes, rhumes, and laxes, the moone being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue attractive, the moone in Aries, Leo, or Sagittarius.

Good to comfort the vertue digestive, the moone in Gemini, Libra, or Aquarius.

Good to comfort the vertue retentive, the moone in Taurus, Virgo, or Capricorne.

Neue. 1617.

Good to comfort the vertue expulsive, the moone in  
Cancer, Scorpio, or Pisces.

For vnguent or plaisters, it is best applyed  
when the moone is in that signe which governeth the  
same member or part of the body, to which it is appliable.

### For Sweatings.

Sweatings, as they are of two sorts, that is to say, na-  
turall and artificiall, so they are vled for two ends &  
purposes: the naturall sweate, if good heed be taken in o-  
pening the pores, will dissolue grosse and thicke humors,  
will cleanse the blood will comfort the spirits, will put  
away colde, will consume rawe humors, quallifie and  
quench raging fevers, will helpe numbnesse & the dropsie.  
The artificiall sweate will cleanse scabs, put away itch,  
amend dulnesse in hearing ease the stone, resolute congea-  
led and cold melancholy blood and humors, &c. But for  
the better performing and effectual working in these cau-  
ses, the counsell of the learned Physitian is to be desired  
and vled.

The best and moost signes to sweat in, are Leo, Aries,  
and Sagitarius, and that two or thre dayes after the  
Change, and at the full of the Moone. And note that  
sweatings is better to be done at the eueing, then in the  
morning: for when the body hath nourishment within,  
the spirits shall not bee drawne vterly forth, to the ex-  
treme parts. Note further, that leane and dry folkes, or  
feeble persons must sweat little, for it will hurt the much:  
but fat folkes may sweat well, & it will helpe the much.

## ¶ A Description of the foure quarters of this yeare of our Lord

God. 1617.

Of Winter.

VVinter (which is the thicke capital for the Spring,  
the disgrace of Summer, and the deepe leuour  
of

## A Prognostication.

of the fruitfull Harvest) began to take his effects (con-  
 cording to our usuall computation) the 12. of Decem-  
 ber, in the yeare afore-going, at the first entring of the  
 Sun into the first iniure of the signe Capricornus. at  
 which time, the Sun shall be at his greatest south decli-  
 nation, from the equinoctiall line, so that he riseth south-  
 east and setteth south-west. Now is the hiemall or win-  
 ter solstice: for the Sun is so farre remoued from our Je-  
 niti: or verticall point, that he cannot decline any further,  
 and stands at a stop and stay and then is the shortest day  
 in all the yeare, & longest night: and so this quarter both  
 continue vnto the 11. of March next ensuing.

This season is by nature cold and moist, vnpleas-  
 ant for travellers, eyther by land or sea, and vnto aged per-  
 sons it is very cumbrous and noysome, causing superflui-  
 ty of rawnesse, and abundance of cold moistnesse to ouer-  
 flow their bodies, to their great trouble & disquietnes, &c.

Touching the inclination and disposition of the wea-  
 ther for this quarter I gather generally, that we are like  
 to haue many sharpe and pinching frosts and boisterous  
 windes, with store of stormy moisture towards the lar-  
 ter end of the quarter.

The diseases most like to afflict mens bodies, will bee  
 many, Quoridian, and putride agues, rheum: coughs,  
 stopping in the lungs and pipes, cramps, and numbnesse  
 of the members, with many other diseases, apt for the co-  
 dition of the quarter.

## Of the Spring.

The Sun (which is the eye of the world, the fountaine  
 of li:ht, and the cheefe moderatour of all the rest of the  
 lights) both like a Gyant run his race, and finished his  
 resolution, (Gradatim) throughout the 12. signes, and  
 now beginneth his iourney afresh againe, and goeth an  
 euen course, and so becomes an indifferent arbiter be-  
 twene the day & night, and maketh an equality through-  
 out his whole gouernment to the great ioy and comfort  
 of all his reuiued subjects: cheeryng with his splendant  
 countenance, the poore afflicted weather-worne sweetes  
 of this our darke starre of mortality, (which the dark-

ned

## Neue. 1617.

red countenance of winters. Proximity had almost subdued) With his most excellent presence, Whereat Earth begins to smile, and to put on her new apparell, the flourishing livery of fresh Flora, whose liberal proceedings are likely to be hindered with many cold blasts & darke clouds, with some other dis temperatures, to the damage of all sorts of budding, blooming, and sprouting things. This season is naturally hot and moist the most temperate time of the yeare, and least breeder of sicknesses that both procure death, and a conuenient time for the removing of sicknesses and griefes gotten before, & also to auoyde and prevent those that are to come, for now the dull senses and spirits of men and other creatures are quickned and reuiued, and therefore the humours which do abound and are ready to repress nature, are fit to be emptied and alioyded, whether by blood-letting, purging, or otherwise, as the learned Physician shall aduise, and as the cause of the disease shall require: such therefore as are diseased let them not neglect this time.

The diseases or sicknesses of this season are supposed to be many kinde of scabs and itching, wandring feuers, inflammations of the Liver, pleurides, impostumes, pox & meales, with much corruption of blood, and such diseases as may proceede thereof. Let vs call vpon the Almighty, that he may still continue his accustomed mercies and favourable blessings vnto vs, both now and evermore. Amen.

## Of Summer.

Summer, the third part of our vulgar yeare, according to our usual computation, beginneth now when the Sun hath fully determined the Spring time, with the last Grade of Gemini and hath mounted in his motion to the highest point of his course, namely to the first degree of Cancer which wil be this yeare the 12 of June. Now is the second solstice of the yeare called the estiuall or summer solstice: for enen as the Sonne when he entered into Capricorne hath his greatest south declination from the equinoctial line: so now at his ingresse into the beginning of Cancer, he hath his greatest declination towards

## A Prognostication.

towards the North, from the same equinoctiall line. And even then as at the time of the winter solstice, he was so farre removed from our verticall point, that he could not move no further towards the south, and was therefore to approach againe towards our north latitude, at which time he seemeth to stand: so now being come so neare our Zenith, that hee cannot move no further towards the North, and is therefore to reuert againe towards the south latitude: at his first going from vs he seemeth also to stand, insomuch, that even as befoze at his returne towards vs, hee made with vs the shortest day and the longest night in the yeare: so now at his returne from vs, he maketh contrariwise the longest day & shortest night in the yeare: and afterward declineth daily more and more from vs, like as befoze hee moved more and more towards vs.

This season according to his proper nature is hot and dry, turning the humors of mens bodies, from coldnesse and moistnesse, into hotnesse and drynesse, resembling the element of fire, and complexion of chollicke: bringing all fruites to their ripenesse, cattell to their fatnesse, and men to their wealth.

Touching the disposition of the weather, I suppose that it will something disagree from his naturall quality. The infirmities of this season are likely to bee many, hot burning fevers, burnings, horie impostumes, of chollicke humors. the heate also of blood will cause dangerous diseases, especially to such as have bled much hotte swines and strong drunke. With many other diseases, which the Lord of his mercy turne from his elect.

## Of the last quarter, called, Autumne.

**A**utumne, (according to our accustomed computation) the last quarter of this yeare, begins at the Sunns departure from the last scale of Virgo, into the first degree of the second equinoctiall Agne Libra, which will be this yeare on the 13 of September, the day & night being of an equall length as in the Spring: at which time is the autumnall equinoctiall: for even as at the  
Sunnes

Neue. 1617.

Suns entrance into Tries, the day by encreasing from the winter Solstice, till then cannot bee equall with the night, going on still more and more till the summer Solstice, when was the longest day and shortest night. So now the night by increasing from the equinall solstice to this the suns ingredience into Libra, hath got to be equall with the day, and shall increase more & more till the Autumnall Solstice come againe, when the night is longest & the day shortest. And this time of the yeare is of it selfe vnconstant and variable, warme in the day time & cold in the night. As concerning the state of the season for this quarter, I coniecture it will bee distemperate, with great windes and cold stormes. The sicknesses and diseases incident to this time, are obstructions in the Liver, quartaine agues, black jaundies, dropsies, gouts, consumptions, hemeroides, and many other diseases, which proceed of melancholly, &c.

¶ *A declaration of the inclination and disposition of the weather and winds, according to the diuers motions and influences, of the Erraticall & fixed stars; with the day, houre, and minute of the change of the Moone, her full, & quarters; and also of the rising and setting of the Sun, in euery seauenth day of euery month of this yeare of our Lord God. 1617.*

¶ Of Ianuary.

Day	The sunne riseth.	The sunne setteth.
1	howre 8 and 3 minuts	howre 3 and 57 minuts.
7	howre 7 and 56 minuts	howre 4 and 4 minuts.
14	howre 7 and 46 minuts	howr 4 and 14 minuts.
21	howre 7 and 34 minuts	howre 4 and 26 minuts.
28	howre 7 and 23 minuts	howre 4 and 37 minuts.

First quarter the 4. day, 9. minuts after foure of the clocke in the morning, windy and stormy.

Full moone the 11. day, 16. minuts after 5. of the clock at night, inclined to stormy moisture.

Last quarter the 19. day, 7. minuts after ten of the clocke at night, windy, with raine or snow.

New moone the 26. day, 34. minuts after 11. of the clocke at night, frosty and cold.

Janu.

## A Prognostication:

### Ianuaries Abstract.

In this Month of Ianuary let not bloud, neither be  
but little Phlegme, except necessity constraineth, and  
beware of taking cold, for in this month, Rheumes and  
Flegme do much increase, to fast long is hurtfull, but to  
drinke white-wine fasting is good and wholesome, vse  
meates and drinks that are naturally hot, moderately,  
and weare warm cloathes.

In worldly businesse this month you may set all kind of  
common fruit-trees, as Pears, Plums, Cherries, Fil-  
berds, Walnuts, and such like Haw-thornes, and all sorts  
of quicke-setts, trees, or Plants, are fittest to be set, gene-  
rally from the change to the first quarter.

Take away the Holle and superfluous branches from  
your trees, & this month it is good to set Beanes, pease,  
Parsneps, Radish, Leekes, Garlike Turneps, and Po-  
nions, if the weather be milde, and the moone past her full.  
You may begin to Graffe at the ende of this month, so as  
the moone be increasing in her light.

Good husbands also this month, crop their Trees, fell  
Timber, and geld their Cattell, such as must be gelded,  
the state of the moone alwaies considered.

### ¶ Of February.

Day	The Sun riseth.	The Sun setteth.
1	hou. 7 and 13 min.	houre 4 and 47 min.
7	hour 7 and 4 min.	houre 4 and 56 min.
14	hou. 6 and 50 min.	houre 5 and 10 min.
21	hou. 6 and 34 min.	houre 5 and 26 min.
28	hou. 6 and 22 min.	houre 5 and 38 min.

First quarter the 2. day, 47 minutes after two of the  
clocke in the afternoon, answerable to the season.

Full moone the 10. day, 18. minutes, after high noone,  
winterly weather.

Last quarter the 18. day, 41. minutes after 2. of the  
clocke in the afternoon, apt for the time.

New moone the 25. day, 15 minutes after 9. of the clock  
in the forenoone, inclined to moysture.

Februaries

Neue. 1617.

Februaryes Abstract.

In this moneth of February, all stumpy fish, Whike, or Wice, and such like, that doe oppilate or stop the Liver and veins, or thicken the blood, are to be sicke, and enemies to health: also yet forbear Whilcke and letting of blood, except great necessity do constrain it, and learned counsell do advise it. Beware of straking cold, for now are Agues apt to be taken, and it is very ill to take heats, and afterwards to have cold upon them.

In this month, is the most aptest time to graft, to plant, and to set all kind of trees and bushes, the winde & weather, and age of the moone afore-hand considered. Pease, Beans, Haskings, Onions, Parsneps, and such like, as in January, may very fitly bee set in the wane of the Moone. The time is now to trim by Gardens, to set and sow all kindes of Kitchen hearbs, to set slips, and to sow Kernels, to sow Mustard seed and Dates, to set hops and Vines, and to cut and prune them, and to sticke by your counsell Pease and Haskings.

Of March.

Day	The Sun riseth.	The Sun setteeth.
1	hou. 6 and 20 min.	houe 5 and 40 min.
7	hou. 6 and 8 minut	houe 5 and 52 min.
14	hou. 5 and 54 min.	houe 5 and 6 min.
21	houe 5 and 40 min.	houe 6 and 20 min.
28	houe 5 and 26 min.	houe 6 and 24 min.

First quarter the 4. day, 52. minutes after 3. of the clock in the morning, over falling clouds.

Full moone the 12. day, 34. minutes after 6. of the clock in the morning reasonable temperate.

Last quarter the 20. day, 32. minutes after 3. of the clocke in the morning, cold and cloudy.

New moone the 26. day, 12. minutes after sixe of the clocke at night, some storme to be expected.

Marches Abstract.

In this moneth of March, the humours of mans

## A Prognostication.

mans body begin to increase : and nowe grosse feeding breedeth grosse blood and grosse humors: and therefore vse meats of good digestion, & such as breed good succce. It is a good time to purge and clarifie the blood, by Potions, Bathings, and Blood-letting, or such other waies, as the learned Physitian shal appoint, and as the cause of the disease shal require. Now also sweet meats and drinks are commendable.

The time of grafting as yet indureth together, with setting, sowing, prouing, and plashing, of Vines, Wyddes, Willowes, Dates, Arde-pease, Daions, and Hartneps, and such like, &c.

### ¶ Of April.

Day	The Sun riseth.	The Sun setteth.
1	hou. 5 and 18 min.	houre 6 and 42 min.
7	hou. 5 and 6 min.	houre 6 and 54 min.
14	hou. 5 and 54 min.	houre 7 and 6 min.
21	hou. 4 and 39 min.	houre 7 and 21 min.
28	hou. 4 and 29 min.	houre 7 and 31 min.

First quarter the 2. day, about 7. of the clocke at night, apt for m. picture.

Full moone the 10. day, about 8 11. of the clocke at night, subiect to winde, and storm.

Last quarter the 18. day, 35. minutes after one of the clocke in the afternoone, storm and vnconstant.

New Moone the 25. day, 28. minutes after 4. of the clocke in the morning, windy and waucering.

### Aprils Abstract.

In this month of Aprill, the pores of men are opened, and are apt to receiue Phisicke: and they that now refuse the same, I commit them

Neue. 1617.

to the benifite of Nature, for of all times of the  
 yere, this is the best time to prevent causes of  
 sicknesses, or for speedy remedie in extremit-  
 ties: for now nature her selfe dooth renew  
 strength through all the body. So where sick-  
 nesse happeneth, thes soone vnburdeneth by the  
 meanes of Physicke: wherefore what it cannot  
 doe now, hereafter it will hardly be done, there-  
 fore take time whilst time is, &c.

As yet you may graft and poyne Vines, also set Me-  
 lons, Cowcumbers, Citrons, Hartshokes, and pole by  
 Hops, sow Barley, Camiers apply themselues to War-  
 king of trees, &c.

9 Of May.

Day	The Sun riseth.	The Sun setteth.
1	hou. 4 and 23 min.	hour 7 and 37 min.
7	hou. 4 and 15 min.	hour 7 and 45 min.
14	hou. 4 and 5 min.	hour 7 and 55 min.
21	hou. 3 and 56 min.	houre 8 and 4 min.
28	hou. 3 and 50 min.	hour 8 and 10 min.

first quarter the 2. day, 30. minutes after a 11. of the  
 clocke in the forenoone, fitting the season.

full moone the 10 day, 16. minutes after 1. of the clock  
 in the afternoone, some rainy showers.

last quarter the 17. day, 27. minutes after 6. of the clock  
 at night, over-casting clouds.

new moone the 24. day, 33. minutes after high noon,  
 apt for the time.

Mayes Abstract.

In this month of May rise early, for May dooth not  
 lone any sluggards. And let such as be in health and a-  
 ble, walke into the fieldes, and to eate and drinke a little  
 berries

## A Prognostication

berme to wholesome: abstain from all meats as be of a  
hot nature. And for such as be sick, it is a very good time  
to take blood, or to take Physicke. Such as bee whole,  
God keepe them in health: and such as bee sicke, God  
send them good Physicians and Physicke.

The time being now so late in June, I have some such  
foretelling, as before might not be soone, because of the  
coldness of the weather. Yet I age according to the pro-  
uerb, let I age in May, and it will last all day. Now that  
and many, let that which I have wrote your hope and En-  
dens, see to your Grasse, that no superfluous branches  
trouble them: And beu Rosemary flowers, and Beane  
flowers, may at your pleasure be distilled this month, and  
more also haue a care of watching your bees.

### ¶ Of June.

Day	The sunne riseth.	The sunne setteth.
1	howre 3. and 49. min.	howre 8. and 11. minutes.
2	howre 3. and 46. min.	howre 8. and 14. minutes.
14	howre 3. and 47. min.	howre 8. and 13. minutes.
21	howre 3. and 49. min.	howre 8. and 11. minutes.
28	howre 3. and 51. min.	howre 8. and 8. minutes.

First quarter the first day, 44. minutes after 4. of the  
clocke in the morning, reasonable tempe. etc.

Full mone the 9. day, 4. minutes after one of the clock  
in the morning, overcasting clouds.

Last quarter the 15. day, 47. minutes after 10. of the  
clocke at night, some heate drops.

22. day, 14. minutes after 11. of the  
clocke at night, some fall of moisture.

First quarter the 20. day, 18. minutes after 9. of the  
clocke at night, unconstant.

### Iunes Abstract.

In this Moneth of Iune, if thou must needes  
use Physicke, take it early in the morning,  
that it may haue wrought before the heate of the  
day: and vse a light or thinne dyet, for the sto-  
macke

make is not now so able to digest as in winter,  
or some other of the former Monthes. It is very  
good and convenient for some to drinke clarifi-  
ed Whay, boyled with cold Hearbes, and to ab-  
staine from violent exercises.

Distilling of Roses making Urrops and conserues are  
now in the prime. Now gather such hearbs as you meane  
to keepe all the yeare, but be sure you dry them in shade.  
Good Husbands and huswiues, are now wedding of the  
Coyne & Gardens, others shearing their sheep. The times  
serues to set Rosemary and Gilliflowers. Take heede  
now of cutting of either hedge, tree, or herbs with knife,  
but rather gather them with your fingers. Now may you  
set Daffodils, carry out compost, make Hay, and Gardens  
of Squales, Tuts, or Pismires, &c.

¶ Of Iuly.

Day	The Sun riseth.	The Sun setteth.
1	hou. 3 and 54 min.	houre 8 and 6 min.
7	hou. 3 and 59 min.	houre 8 and 1 min.
14	hou. 4 and 7 minut	houre 7 and 53 min.
21	hour 4 and 20 min.	houre 7 and 40 min.
28	hour 4 and 30 min.	houre 7 and 30 min.

Full moone the 8. day, 9. minutes after 11. of the clocke  
in the forenoone, sitting the season.

Last quarter the 6. day, 49 minutes after 2 of the clock  
in the morning, pleasant weather.

New moone the 22. day 47 minutes after 11. of the  
clocke in the forenoone, a hot change.

First quarter the 30. day, 17. minutes after 2. of the  
clocke in the afternoone, overcasting clouds for raine.

Iulies Abstract.

In this month of Iuly, vse cold hearbs. and cold meats,  
sustain no great thirst, for feare of breeding of Agues and  
Pestilence, abstaine from Whiske and extreame exerci-  
ses. And now the Riuers are more wholesome then the  
Baths.

## A Prognostication

**Bothe.** Let the Sunne be by before you walke abroad, and take heed of filthy gutters, and stinking lanes. In the time of any plague or pestilence, keep your chamber windows close shut, aswell all night, as also in close, foggy, and mist daies, opening them when the sun hath force of shining, and bee sure to perfume your Chambers every euening, with Balsicke or Frankincense, or with Carre put vpon a Chasing-dish of Coales: then which nothing is better, and let them ble Carduus Benedictus, boyled and drinke fasting.

Harbaruest now calleth slacke husbands to work, and such as haue leisure, it is good to sallow for wheat, and to carry out soile, and to gather seeds and flowers to keepe al the year, and to dry the flowers in the shade, till they be almost dry, and then set them a while to the sun, that they mould not: and in like manner may you ble your hearbs.

### ¶ Of August.

Day	The Sun riseth.	The Sun setteth.
1	hou. 4 and 36 min.	houre 7 and 24 min.
7	hou 4 and 48 min.	houre 7 and 12 min.
14	hour. 5 and 0 min.	houre 7 and 0 min.
21	hou. 5 and 16 min	hour 6 and 44 min.
28	hou. 5 and 27 min.	hour 6 and 33 min.

Full Moone the 6. day, 5 . minutes after 4 of the clocke at night, somewhat windy

Last quarter the 13. day, 57 minutes after 7. of the clock in the forenoone vnconstant.

New moone the 21. day, 18. minutes after 2. of the clocke in the morning stirring the season.

First quarter the 19. day, about six of the clock in the morning, some fall of moisture

### Augusts Abitrac.

In August moderate diet is good whilke, for now it is very dangerous to surfeit: and take good heede of heates and then colles, for nothing sooner engendereth Diurthes. And be not to sleepe much, and especially after noont, for making Apilations, and for anyoing of Agues,

# Neue. 1617.

Agues, and the Headach, and Catarrhes. And let a man abstaine from phisick this month, except gr. eaz. necessity compell him

Now Lady Ceres looks to haue men enough to attend vpon her. and he that wil not now bestir him to gather in wheat, is well worthy to eate browne Bread at Christmas. They that would haue good seeds for their Garden the next year must now gather of their own, least in buying abroad, they loose both their money, fruit, and labour. And such as desire to haue Lettice, or other Hearbs for winter, may commit seeds to the ear h now in the increase of the Moone.

## ¶ Of September.

Day	The sunne riseth.	The sunne setteth.
1	howre 5 and 34 miny.	howre 6 and 26 minutes
7	howre 5 and 46 minu.	howre 6 and 14 minutes
14	howre 6 and 2 minutes	howre 5 and 58 minutes
21	howre 6 and 16 minu.	howre 5 and 46 minutes
28	howre 6 and 28 minu.	howre 5 and 32 minutes

Full moon the 5 day, 8. minutes after foure of the clock in the morning, inclined to mophure.

Last quarter the 11. day, 40 minutes after 7. of the clock at night, subject to raine and winde.

New Moone the 19. day, 42 minutes after 6. of the clocke at night, waivering and vnconstant.

first quarter the 27 day, 38. minutes after 7. of the clocke at night ouer casting cloudes.

## September's Abstract.

In this month of September, such as haue need may safely take Phisicke, and also may bath and bleede. In this month all things are in their proper vertue. And such fruits as are ripe, and not infected, are good to eat, for such as haue good stomacks.

The time is good to make conserues of Barberies and Quinces, winter hearbs must be now sowne, likewise is the time to set Hartichokes, Rose-trees, Apples, Pears, Wardens, Strawberries, Violets, Gilliflowers. Apples are to be gathered at the full of the moon, low Pars-

## A Prognostication.

nepe, and in dry weather gather your Hops. Good husbandry is sowing Rye and wheat, and good huswainery is making of Merisseye, and picking of Hemp. &c.

### ¶ Of October.

Day	The sunne riseth.	The sunne setteth.
1	howre 6 and 34 minu.	hovvre 5 and 26 minutes
7	howre 6 and 46 minu.	hovvre 5 and 14 minutes
14	hovvre 7 and 6 minutes	hovvre 4 and 0 minutes
21	hovvre 7 and 15 minu.	hovvre 4 and 45 minutes
28	hovvre 7 and 26 minu.	hovvre 4 and 34 minutes

Full Moone the 4. day, 34. minutes after 11. of the clocke in the forenoon, setting the time.

Last quarter the 10 day, 58 minutes after high Moone, some small mizzle.

New Moone the 19. day, 28 minutes after high noon, stormy and vnconstant.

First quarter the 27. day, 21. minutes after 7. of the clock in the morning, windy and stormy.

### Octobers Abstract.

In this month of October, thou mayst take Phisicke, and also bleed and bath if occasion serue, vse hot meates, and drinke any good wholesome wines to nourish good blood: and beware of taking colde, because the Quarrtaine Ague will be apt to be taken, and such other dangerous diseases.

Remove your Trees, as Apples, Peares, Quinces, Roses, &c. Set Pease, Parsneps, &c.

Good Husbands need not be hastied to sowing of wheat, let Pluts, Acornes, and fibberds, and to doing of such good husbandry.

### ¶ Of Nouember.

Day	The sunne riseth.	The sunne setteth.
1	hovvre 7 and 33 minutes	hovvre 4 and 27 minutes
7	hovvre 7 and 42 minutes	hovvre 4 and 18 minutes
14	hovvre 7 and 52 minutes	hovvre 3 and 8 minutes
21	hovvre 8 and 3 minutes	hovvre 4 and 57 minutes
28	hovvre 8 and 9 minutes	hovvre 3 and 51 minutes

Last

## Nene. 1617.

Full moone, the 2. day, 12 min. after 10. of the clocke at night, windy and stormy.

Last quarter the 10. day, 21. min. after 2 of the clocke in the morning, sitting the season.

New moone the 18. day, 9. min. after 6. of the clocke in the morning, windy and vnconstant.

First quarter the 25. day, 49 min. after 4 of the Clocke at night, apt for the season.

### Nouembers Abstract.

In Nouember finish the Whiske, that yee meane to take, and so rest till March, except som great necessitye compell thee, vse good meats and wholesome Wine to nourish thy bloud: provide thee warme clothing, and go dry of thy feet, or else make sure account of rheume & Palse, besides some other inconvenience that will ensue. Beware of the hot house this month, and vse Bettony and Cinamon in drinke.

In the new of the Moone, you may remooue young trees as in the last month, and set Crab-tree stocks to graie vpon, when you please. It is also a good time in the wane of the moone, to set Pease, Beans, and if the weather be not too hard, it is good sowing of parnepps, good making of Malt, and killing of Swines & Swine.

### Of December.

Day

The sunne riseth.

The sunne setteth.

1

howre 8 and 12 minu.

howre 3 and 48 minutes

7

howre 8 and 14 minu.

howre 3 and 46 minutes

14

howre 8 and 15 minu.

howre 3 and 45. minutes

21

howre 8 and 12 minu.

howre 3 and 43 minutes

28

howre 8 and 7 minu.

howre 3 and 52 minutes

Full moone the 2. day, 22. minutes after 9. of the clocke in the forenoone some fall of moysture.

Last quarter the 9. day, 2. minutes after 10. of the clocke at night, answerable to the time.

New moon the 17. day, 38. minutes after 10. of the clocke at night inclined to ouer casting clouds for moysture.

First quarter the 25 day, 18 minutes before one of the clock in the morning, frosty and cold.

Full moone the 31 day 21 minu. after 10. of the clocke at night, subject to snow or raine.

## A Prognostication,

### Decembers Abstract.

In this month of December, keepe thy body and head from cold; and eat such meates as bee of hot quality, abstaine from Drinck, and let thy Diet be thy Drinke, warme clothing thy Horse, merry company thy Keepers, and good hospitality thine exercise.

Winters eas and troubles as at October in November. If the weather prove not extreme. In the wane of the moone, let Beans and Pease, and those hearbs that cannot indure the cold, couer them with straw, or other provision, from the frosts and snow. Finally, thus ending the old yeare, let vs repent vs, and forsake our old sinnes and lead newe liues, all the daies of this miserable and transitory life, that in the end, we may be translated into everlasting ioy and happinesse, through Iesus Christ our Saviour, who be praised for euer and euer, Amen.

## A Precaution and aduertisement,

made for every month of this yeare of our Lord God 1617. declaring the dangerous daies and nights to take any sicknesse, or to be sicke in: whereby every man may take heed to himselfe, and so provide in time for speedy remedy.

### ¶ Of January 1617.

The 4 day and most part of the night, and the 7 day dangerous, the 11 and 14 daies and nights likewise, the 18 day and all night untill the next day at noone, and the 21 day and most part of the night dangerous, the 25, 27 and 31. all the dayes and nights very dangerous.

### ¶ Of February 1617:

The 2 and 7 dayes and nights dangerous, the 9. and all night untill the next day at noone likewise the 15 day and most part of the night, and the 17 day also dangerous

## Neuc. 1617.
